Volume 223 February 1991

CONTENTS

An experimental study of unstable barotropic vortices in a rotating fluid. R. C. Kloosterziel and G. J. F. van Heijst *page* 1

Surface wave and thermocapillary instabilities in a liquid film flow. D. A. Goussis and R. E. Kelly 25

Wave motion in a viscous fluid of variable depth. Part 2. Moving contact line. John Miles 47

Effect of the contact line on droplet spreading. Patrick J. Haley and Michael J. Miksis 57

On a stable solute gradient heated from below with prescribed temperature. J. Kerpel, J. Tanny and A. Tsinober 83

Asymptotic analysis of the fully developed region of an incompressible, free, turbulent, round jet. W. B. Bush and L. Krishnamurthy 93

Experiments on the structure and dynamics of forced, quasi-two-dimensional turbulence. S. Narimousa, T. Maxworthy and G. R. Spedding 113

Two-layer hydraulics: a functional approach. Stuart B. Dalziel 135

Effects of rotation on turbulent mixing across a density interface. M. Fleury, M. Mory, E. J. Hopfinger and D. Auchere 165

A model of turbulent mixing across a density interface including the effect of rotation. Mathieu Mory 193

Responses to topographical forcing. Wolfgang Fennel and Martin Schmidt 209

Examination of v-velocity fluctuations in a turbulent channel flow in the context of sediment transport. T. Wei and W. W. Willmarth 241

Mode selection and resonant phase locking in unstable axisymmetric jets. T. C. Corke, F. Shakib and H. M. Nagib 253

Thin static drops with a free attachment boundary. E. O. Tuck and L. W. Schwartz 313

The dissipitive structure of shock waves in dense gases. M. S. Cramer and A. B. Crickenberger 325

The exact solution to Phillips' equation for the degree of saturation of short waves in the presence of ocean currents. S. J. Hogan 357

Lighthill quadrupole radiation in supersonic propeller acoustics. N. Peake and D. G. Crighton 363

Two-dimensional cusped interfaces. Daniel D. Joseph, John Nelson, Michael Renardy and Yuriko Renardy 383

Nonlinear dynamics of viscoelastic flow in axisymmetric abrupt contractions. Gareth H. McKinley, William P. Raiford, Robert A. Brown and Robert C. Armstrong 411

Time-periodic convection in porous media: the evolution of Hopf bifurcations with aspect ratio. D. S. Riley and K. H. Winters 457

The strong nonlinear interaction of Tollmien–Schlichting waves and Taylor–Görtler vortices in curved channel flow. J. Bennett, P. Hall and F. T. Smith 475

Boundary conditions for rapid granular flows: phase interfaces. J. T. Jenkins and E. Askari 497

Trapped waves over symmetric thin bodies. D. V. Evans and P. McIver 509

Passive scalar transport in β-plane turbulence. Peter Bartello and Greg Holloway 521

Dispersion in a curved tube during oscillatory flow. M. K. Sharp, R. D. Kamm, A. H. Shapiro, E. Kimmel and G. E. Karniadakis 537

Dynamics of ventilated coherent cold eddies on a sloping bottom. Gordon E. Swaters and Glenn R. Flierl 565

On localized solutions in nonlinear Faraday resonance. E. W. Laedke and K. H. Spatschek 589

A numerical study of nonlinear energy fluxes due to wave–wave interactions. Part 1. Methodology and basic results. D. Resio and W. Perrie 603

Buoyant inhibition of Ekman transport on a slope and its effect on stratified spin-up. Parker MacCready and Peter B. Rhines 631

Reviews

Chaotic Dynamics: An Introduction, by G. L. Baker and J. P. Gollub 662

Theories of Fluid Flows through Natural Rocks, by G. I. Barenblatt, V. M. Entov and V. M. Ryzhik 663
